Setup
block

(useful for function initialization. it will be run before every test, and is not part of the benchmark.)

```
1 ▾ const recipes = [  
2 ▾   {  
3     id: 1,  
4     name: 'Limonade de Coco',  
5     servings: 1,  
6 ▾   ingredients: [  
7 ▾     {  
8       ingredient: 'Lait de coco',  
9       quantity: 400,  
10      unit: 'ml',  
11    }],  
12 ▾   }
```

ADD LIBRARY

JSBEN.CH

```
6      document.getElementById( "recipes" ).innerHTML = "",
7      const secondfilteredRecipes = [];
8      filteredRecipes.filter((recipe) => filterRecipes(element
9      displayResults(secondfilteredRecipes);
10     }
11     error(e);
12     // throw new Error("pas de recettes trouvées")
13   });
14 };
```

code block 2

```
1  const filterRecipesWithPrincipaleSearchBar = (filteredRecipes)
2    const searchUser = document.getElementById("searchInput");
3  searchUser.addEventListener("input", (e) => {
4    const element = e.target.value.toLowerCase();
5    if (element.length >= 3) {
6      document.getElementById("recipes").innerHTML = "";
7      const secondfilteredRecipes = [];
8      for (let i=0; i < filteredRecipes.length;i++) {
```
